antimicrobial polishing cloth and 12 iKlear Travel Singles and one travel size microfiber chamois cloth.

The proprietary solution cleans, protects and preserves modern displays with every use. The iKlear solution safely removes dirt, dust, lint and fingerprints and leaves the screen with an anti-static finish on the surface so you don't have to clean as often.

Recent studies have shown computer keyboards and other touch pad surfaces to be potential breeding grounds for germs. The exclusive iKlear DMT antibacterial cloth maintains its germ fighting properties for the life of the cloth. This unique, dual micro textured cloth is made to eliminate over 99.0% of the bacteria that can be found on keyboards, track pads, touch screen surfaces and computer mice.

Klear Screen is the original and most recommended cleaning solution since 1992.
